

Possible Outline of Timeplan

1. Defining:

- Timeplan
- Identify the client
- Meet with client
- Write up background to client
- Client needs
- Data input needs
- Software spec

2. Designing:

- Database tables
- Detailed table design
- Processing – design queries
- Design outputs – forms and reports
- Check with client
- Adjust designs as necessary

3. Data Inputs:

- Meet with client?
- Identify data input needs. Write up
- Write up validation/verification methods
- Design error messages

4. Thinking about Evaluation and Testing

- Identify evaluation criteria based on client needs
- Create test plan

5. Implementation – evidence as working through via screenshots etc...

- Create tables – add validation etc...
- Create relationships
- Enter test data
- Create queries and process data
- Create reports
- Create forms and other user interface features
- Deal with database security
- Evidence all above

6. Testing:

- Test solution using test data – functionality and end user testing
- Evidence testing

7. Evaluation:

- Describe actions taken in narrative
- Evaluate solution using evaluation criteria
- Evaluate time management
- Evaluate own performance
- Check everything through
