

Editing an icon

1. Open **CorelDraw**
2. Create a new image: **File > New**
 - a. I usually go 200 pixels by 200 pixels
 - b. Because you want screen use, set the **resolution to 72 dpi**
3. **File > Import >** add the image by clicking **once**
4. Do any editing required - adding text for example
5. Save the image as a CorelDraw file (**File > Save as**). But you also need to export as a PNG (see next slide)

Editing an icon

Export the image as a PNG:

1. **File > Export**
2. Make sure **PNG** is the filetype
3. Check that **Transparency** is ticked
4. **IMPORTANT:** Open the **Transformation section** at the bottom (click on the word)
Change the **size** and make sure the resolution is **72 dpi**
5. Export and then use
