

Exporting from Illustrator

You can't use Illustrator files in PowerPoint, Photoshop or anywhere else

This is because of the **file format**

When you save Illustrator files, they are saved as **.ai files**. This is a type of file that can only be opened in Illustrator

Exporting from Illustrator

To use the file somewhere else, you need to **export it**

1. **File > Export**
2. Change the format to **PNG** (dropdown)
3. Make sure the **Resolution** is set to **Screen (72 ppi)** and the **Background is Transparent**
4. Give your image a sensible name and make sure you know where you are saving it

Exporting from Illustrator

Jobs for today:

1. Add exported versions of your images from last time to your **PowerPoint**
2. Write some words about how you made them
3. Continue making images:
 - a. circle
 - b. waves - make them deep enough
 - c. boat
 - d. lighthouse
 - e. land
