.....
.....

5. List **five** ways that steganography has been done.

1.

2.

3.

4.

5.

6. This page on my website has a number of different pieces of information hidden using steganography. How many can you find? (hint: there are more than 10). Use this page to show what you found.

Steganography

Steganography is the hiding of information in plain site.

The word comes from the Greek words *steganos*, meaning "covered", and *graphein*, meaning "writing" - so "covered writing". Steganography can be used to hide messages without the messages being obviously in code.

So, this Page has a number of Ultra-clever and Devious ways of hiding Several passwords on it.

- check everything on the page
- hidden passwords could be anywhere
- it's possible that the passwords could be in plain site
- possibly even right in front of your eyes
- so, go on – what are you waiting for?

Page created: 21 June 2018.

7. What was the theme on the steganography page?
