

# Animation Challenge

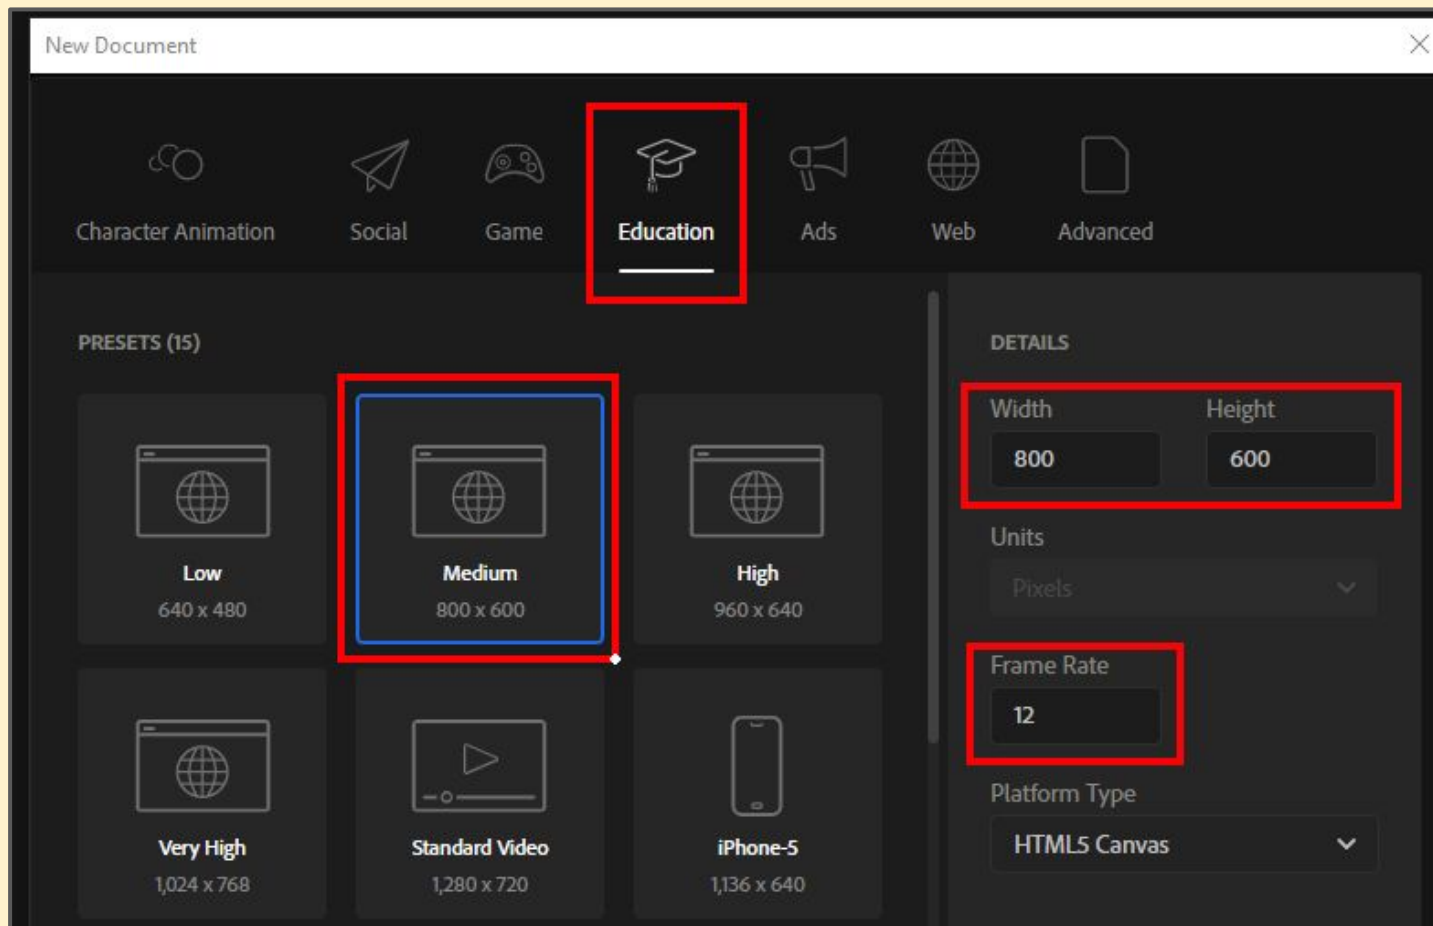

Make a 3+ second animation featuring the skater

It should:

- be at least 3 seconds long
- use the skater figure
- use the dog
- use a background
- the skater should move across the screen
- something funny should happen

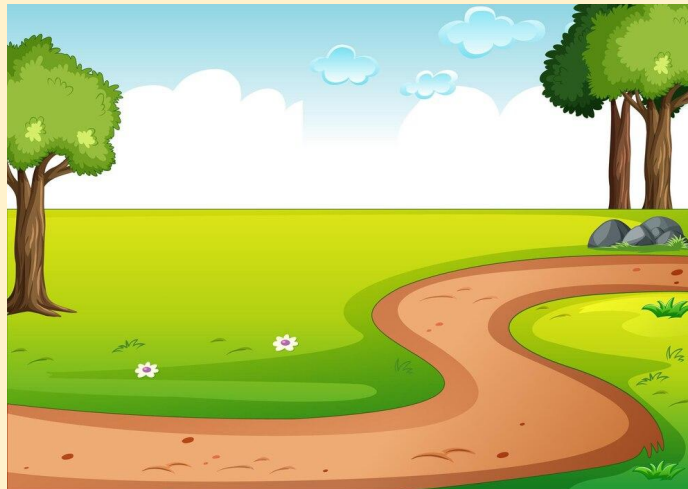

# Animation Challenge

Make sure you get the setup right

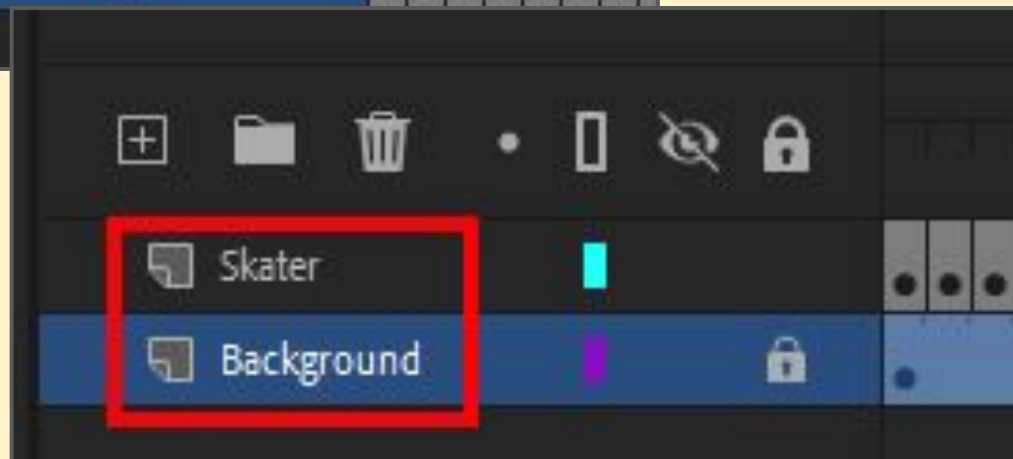

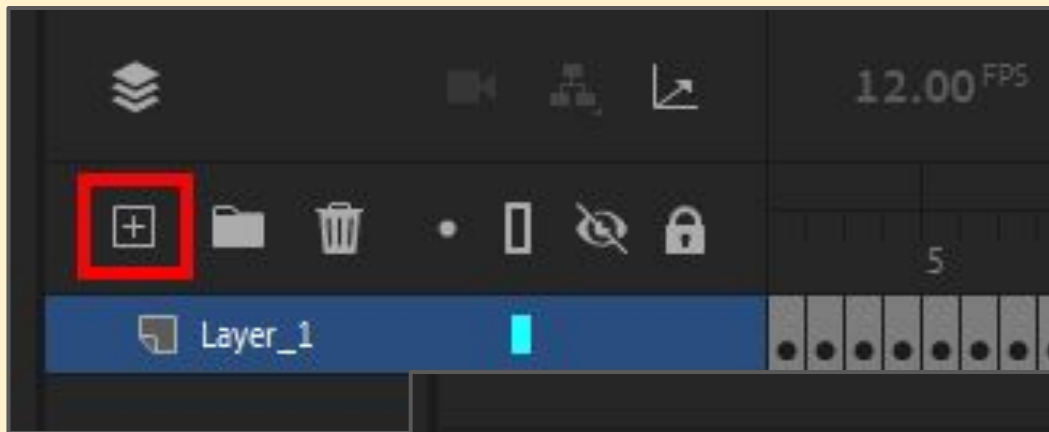

# Animation Challenge

Use the three images - **save** them and the **import** them to the **stage**

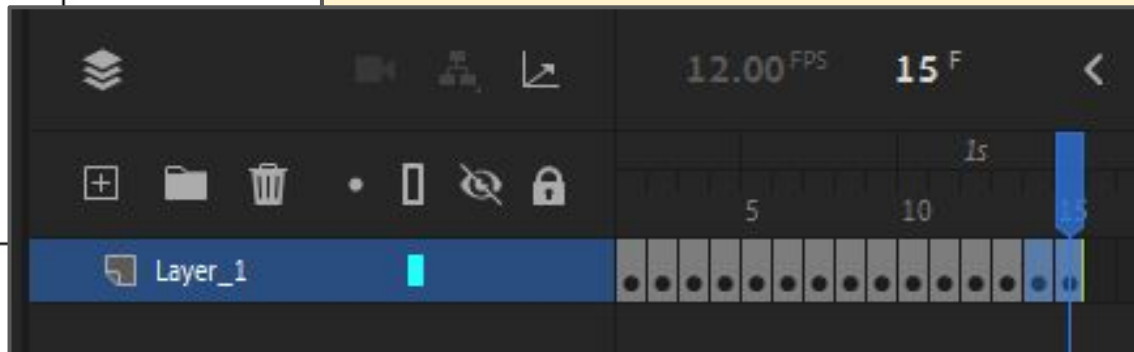

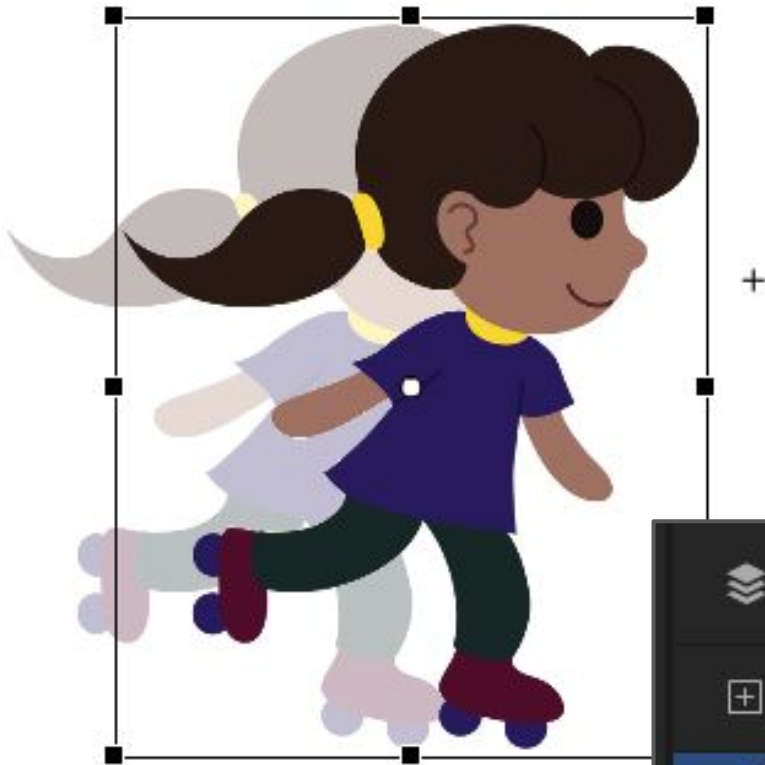

# Animation Challenge

To do this you need to use **layers**. One layer per image

# Animation Challenge

Each **frame** you move the character a short distance

# Animation Challenge

Make sure something funny happens!
