

Data centre DME – Gateway 14

Gateway 14 is a 220,000m² development being built next to junction 50 of the A14, a busy east-west main road that links Felixstowe docks to Cambridge and the motorway system.

The aim is to develop the site as a base for high-tech innovation companies and for logistics companies (the movement of goods).

It is part of a plan to develop the Stowmarket area as a high-tech development area and to bring more jobs in to the local area.
