# Quiz skills – giving feedback

Giving feedback at the end:

You'd need an **IF score =** set of blocks for each score

So, if you have five questions, you'll need **six** sets of blocks (because you can also score 0)

Quiz skills – giving feedback

A more complex method using **nested IF**:

This says: if it's 5, do that; otherwise if it's greater than 2 (so 3 or 4), do this; otherwise if it's greater than 0 (1 or 2) do that; otherwise do the last thing

It works by putting an **IF–ELSE** inside the **ELSE** part of another **IF–ELSE** – which is **nesting your IFs**…
