

# Showing an image

This is how you show a built-in image in micro:python:

```
1  # Showing an image
2  from microbit import *
3
4  display.show(Image.HEART)
5  # don't show an image of a heart!!
6
7  #other useful code ideas
8  sleep(1000)          #sleeps for 1 second
9  display.clear()      #clears the screen
```

There are a whole set of built-in images that you can use
