

# CD Covers Gallery

Use PowerPoint to make a gallery of your work

Each slide should show a CD cover and a short section of text describing what you did

This uses black and white with an exposure and brightness/contrast layer added to make the image more extreme

Text added using a black stroke to make it stand out. Font is Showcard Gothic which is really bold

# CD Covers Gallery

You need to **export** a version of your images as a **JPG file**

**File > Export > set the drop down to JPG**

Save it in a **sensible place**

Then add it to your gallery – **Insert > Picture > This Device**
